Bewahren Sie Schleifbänder nur hängend auf und knicken Sie diese nicht, weil sie sonst unbrauchbar werden.

Mit dem Schleifrahmen (Zubehör) ist eine gleichmäßige, dosierbare Abtragsleistung beim Planschleifen größerer Holzflächen möglich.

Wartung und Service

Wartung und Reinigung

- **Ziehen Sie vor allen Arbeiten am Elektrowerkzeug den Netzstecker aus der Steckdose.**
- **Halten Sie das Elektrowerkzeug und die Lüftungsschlitzte sauber, um gut und sicher zu arbeiten.**

Entfernen Sie anhaftenden Schleifstaub mit einem Pinsel.

Staubgang reinigen (siehe Bild E)

Nehmen Sie von Zeit zu Zeit die Schutzkappe **14** ab und säubern Sie den Staubgang **15**, damit die Saugleistung optimal erhalten bleibt.

Wenn ein Ersatz der Anschlussleitung erforderlich ist, dann ist dies von Bosch oder einer autorisierten Kundendienststelle für Bosch-Elektrowerkzeuge auszuführen, um Sicherheitsgefährdungen zu vermeiden.

Sollte das Elektrowerkzeug trotz sorgfältiger Herstellungs- und Prüfverfahren einmal ausfallen, ist die Reparatur von einer autorisierten Kundendienststelle für Bosch-Elektrowerkzeuge ausführen zu lassen.

Geben Sie bei allen Rückfragen und Ersatzteilbestellungen bitte unbedingt die 10-stellige Sachnummer laut Typenschild des Elektrowerkzeuges an.

Kundendienst und Kundenberatung

Der Kundendienst beantwortet Ihre Fragen zu Reparatur und Wartung Ihres Produkts sowie zu Ersatzteilen. Explosionszeichnungen und Informationen zu Ersatzteilen finden Sie auch unter:

www.bosch-pt.com

Das Bosch-Kundenberater-Team hilft Ihnen gerne bei Fragen zu Kauf, Anwendung und Einstellung von Produkten und Zubehörten.

www.bosch-do-it.de, das Internetportal für Heimwerker und Gartenfreunde.

Entsorgung

Elektrowerkzeuge, Zubehör und Verpackungen sollen einer umweltgerechten Wiederverwertung zugeführt werden.
Werfen Sie Elektrowerkzeuge nicht in den Hausmüll!

Nur für EU-Länder:

Gemäß der Europäischen Richtlinie 2002/96/EG über Elektro- und Elektronik-Altgeräte und ihrer Umsetzung in nationales Recht müssen nicht mehr gebrauchsfähige Elektrowerkzeuge getrennt gesammelt und einer umweltgerechten Wiederverwertung zugeführt werden.

Änderungen vorbehalten.

English

Safety Notes

General Power Tool Safety Warnings

! WARNING **Read all safety warnings and all instructions.** Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference.

The term "power tool" in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

Bosch Power Tools

Work area safety

- **Keep work area clean and well lit.** Cluttered or dark areas invite accidents.
- **Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** Power tools create sparks which may ignite the dust or fumes.
- **Keep children and bystanders away while operating a power tool.** Distractions can cause you to lose control.

Electrical safety

- **Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools.** Unmodified plugs and matching outlets will reduce risk of electric shock.
- **Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.
- **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.
- **Do not abuse the cord.** Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges and moving parts. Damaged or entangled cords increase the risk of electric shock.
- **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.
- **If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply.** Use of an RCD reduces the risk of electric shock.

Personal safety

- **Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.** A moment of inattention while operating power tools may result in serious personal injury.
- **Use personal protective equipment. Always wear eye protection.** Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
- **Prevent unintentional starting.** Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.
- **Remove any adjusting key or wrench before turning the power tool on.** A wrench or a key left attached to a rotating part of the power tool may result in personal injury.
- **Do not overreach.** Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.

► **Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts.** Loose clothes, jewellery or long hair can be caught in moving parts.

► **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of dust collection can reduce dust-related hazards.

Power tool use and care

- **Do not force the power tool. Use the correct power tool for your application.** The correct power tool will do the job better and safer at the rate for which it was designed.
- **Do not use the power tool if the switch does not turn it on and off.** Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
- **Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.
- **Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.
- **Maintain power tools.** Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.
- **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
- **Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.

Service

- **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.

Safety Warnings for Sander

- **Hold power tool by insulated gripping surfaces, because the belt may contact its own cord.** Contact a "live" wire may make exposed metal parts of the power tool "live" and could give the operator an electric shock.
- **Use the machine only for dry sanding.** Penetration of water into the machine increases the risk of an electric shock.
- **Apply the machine to the workpiece only when switched on and switch the machine off only after it has been lifted away from the workpiece.** The power tool can move suddenly.
- **Never touch the running sanding belt.** Danger of injury.

12 | English

- **Pay attention that no persons are put at risk through sparking. Remove any combustible materials in the vicinity.** Sparking occurs when sanding metal materials.
- **Do not use worn, torn or heavily clogged sanding belts.** Damaged sanding belts can tear apart, be thrown from the machine and injure somebody.
- **Caution, fire hazard! Avoid overheating the object being sanded as well as the sander. Always empty the dust collector before taking breaks.** In unfavourable conditions, e. g., when sparks emit from sanding metals, sanding debris in the dust bag, micro filter or paper sack (or in the filter sack or filter of the vacuum cleaner) can self-ignite. Particularly when mixed with remainders of varnish, polyurethane or other chemical materials and when the sanding debris is hot after long periods of working.
- **Regularly clean the power tool's air vents.** The motor's fan will draw the dust inside the housing and excessive accumulation of powdered metal may cause electrical hazards.
- **When working with the machine, always hold it firmly with both hands and provide for a secure stance.** The power tool is guided more secure with both hands.
- **Secure the workpiece.** A workpiece clamped with clamping devices or in a vice is held more secure than by hand.
- **Always wait until the machine has come to a complete stop before placing it down.** The tool insert can jam and lead to loss of control over the power tool.

Products sold in GB only: Your product is fitted with an BS 1363/A approved electric plug with internal fuse (ASTA approved to BS 1362).

If the plug is not suitable for your socket outlets, it should be cut off and an appropriate plug fitted in its place by an authorised customer service agent. The replacement plug should have the same fuse rating as the original plug.

The severed plug must be disposed of to avoid a possible shock hazard and should never be inserted into a mains socket elsewhere.

Products sold in AUS and NZ only: Use a residual current device (RCD) with a rated residual current of 30 mA or less.

Technical Data

Belt Sander		PBS 75 A	PBS 75 AE
Article number		3 603 BA1 0..	3 603 BA1 1..
Rated power input	W	710	750
No-load belt speed	m/min	350	200 – 350
Sanding belt length	mm	533	533
Sanding belt width	mm	75	75
Belt speed preselection		–	●
Connection for internal/external dust extraction		●	●
Weight according to EPTA-Procedure 01/2003	kg	3.4	3.5
Protection class		□/II	□/II

The values given are valid for a nominal voltage [U] of 230 V. For different voltages and models for specific countries, these values can vary.

Product Description and Specifications

Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Intended Use

The machine is intended for dry sanding – with high removal capacity – of wood, plastic, metal, filler as well as varnished surfaces.

Product Features

The numbering of the product features refers to the illustration of the machine on the graphics page.

- 1 Auxiliary handle (insulated gripping surface)
- 2 Sanding belt*
- 3 Clamping lever for sanding belt
- 4 Thumbwheel for belt speed preselection (PBS 75 AE)
- 5 On/Off switch
- 6 Dust box, complete (Microfilter System)
- 7 Lock-on button for On/Off switch
- 8 Handle (insulated gripping surface)
- 9 Extraction adapter
- 10 Extraction outlet
- 11 Latching lever for dust box
- 12 Filter element (Microfilter System)
- 13 Adjustment screw for belt run
- 14 Protection cover
- 15 Dust passage

*Accessories shown or described are not part of the standard delivery scope of the product. A complete overview of accessories can be found in our accessories program.

14 | English**Selecting the Sanding Belt**

Depending on the material to be worked and the required rate of removal, different sanding belts are available:

Grain size	40–240
red:Wood	40–240
For the working of all wooden materials	
For coarse-sanding, e. g. of rough, unplaned beams and boards	coarse 40, 60
For face sanding and planing small irregularities	medium 80, 100, 120
For finish and fine sanding of hard woods	fine 180, 240

Operation**Starting Operation**

- Observe correct mains voltage! The voltage of the power source must agree with the voltage specified on the nameplate of the machine. Power tools marked with 230 V can also be operated with 220 V.

Switching On and Off

To **start** the machine, press the On/Off switch **5** and keep it pressed.

To lock the **pressed** On/Off switch **5**, press the lock-on button **7**.

To **switch off** the machine, release the On/Off switch **5** or when it is locked with the lock-on button **7**, briefly press the On/Off switch **5** and then release it.

When not using the power tool, switch it off in order to save energy.

Preselecting the Belt Speed (PBS 75 AE)

The necessary belt speed can be preselected with the thumbwheel **4**, even during operation.

The required belt speed depends on the material being sanded and on the working conditions, and can be determined by practical testing.

Working Advice

The sanding removal rate and the surface quality are mainly determined by the selection of the sanding belt as well as by the preselected belt speed (PBS 75 AE). The higher the belt speed, the more material is removed and the finer the sanded surface.

Only flawless sanding belts achieve good sanding capacity and make the machine last longer.

Work using the least possible sanding pressure in order to increase the service life of the sanding belts. The machine's own weight is sufficient for a good sanding performance. An excessive increase of the sanding pressure does not lead to an increase of the sanding capacity, but to increased wear of the machine and the sanding belt.

Apply the machine to the workpiece only when switched on. Work with moderate feed and carry out the sanding with parallel and overlapping strokes. Sand in the direction of the grain; sanding across the grain produces an uneven sanding effect.

Particularly when sanding coats of varnish, sand in the direction of the grain as the varnish could melt and smear the surface of the workpiece and the sanding belt. Therefore, work with dust extraction.

A sanding belt used for sanding metal should not be used for other materials.

Use only original Bosch sanding accessories.

Store sanding belts only hanging; avoid creasing, as this makes the belts unusable.

The sanding frame (accessory) allows for uniform and controllable removal capacity when surface grinding larger wooden surfaces.

Maintenance and Service**Maintenance and Cleaning**

- Before any work on the machine itself, pull the mains plug.
- For safe and proper working, always keep the machine and ventilation slots clean.

Remove adherent sanding dust with a brush.

Cleaning the Dust Passage (see figure E)

From time to time, remove the protection cover **14** and clean the dust passage **15** so that the suction capacity remains at an optimum level.

If the replacement of the supply cord is necessary, this has to be done by Bosch or an authorized Bosch service agent in order to avoid a safety hazard.

If the machine should fail despite the care taken in manufacturing and testing procedures, repair should be carried out by an after-sales service centre for Bosch power tools.

In all correspondence and spare parts order, please always include the 10-digit article number given on the type plate of the machine.

After-sales Service and Customer Assistance

Our after-sales service responds to your questions concerning maintenance and repair of your product as well as spare parts. Exploded views and information on spare parts can also be found under:

www.bosch-pt.com

Our customer service representatives can answer your questions concerning possible applications and adjustment of products and accessories.

Disposal

The machine, accessories and packaging should be sorted for environmental-friendly recycling.

Do not dispose of power tools into household waste!

Only for EC countries:

According the European Guideline 2002/96/EC for Waste Electrical and Electronic Equipment and its implementation into national right, power tools that are no longer usable must be collected separately and disposed of in an environmentally correct manner.

Subject to change without notice.

Français

Avertissements de sécurité

Avertissements de sécurité généraux pour l'outil

AVERTISSEMENT Lire tous les avertissements de sécurité et toutes les instructions. Ne pas suivre les avertissements et instructions peut donner lieu à un choc électrique, un incendie et/ou une blessure sérieuse.

Conserver tous les avertissements et toutes les instructions pour pouvoir s'y reporter ultérieurement.

Le terme « outil » dans les avertissements fait référence à votre outil électrique alimenté par le secteur (avec cordon d'alimentation) ou votre outil fonctionnant sur batterie (sans cordon d'alimentation).

Sécurité de la zone de travail

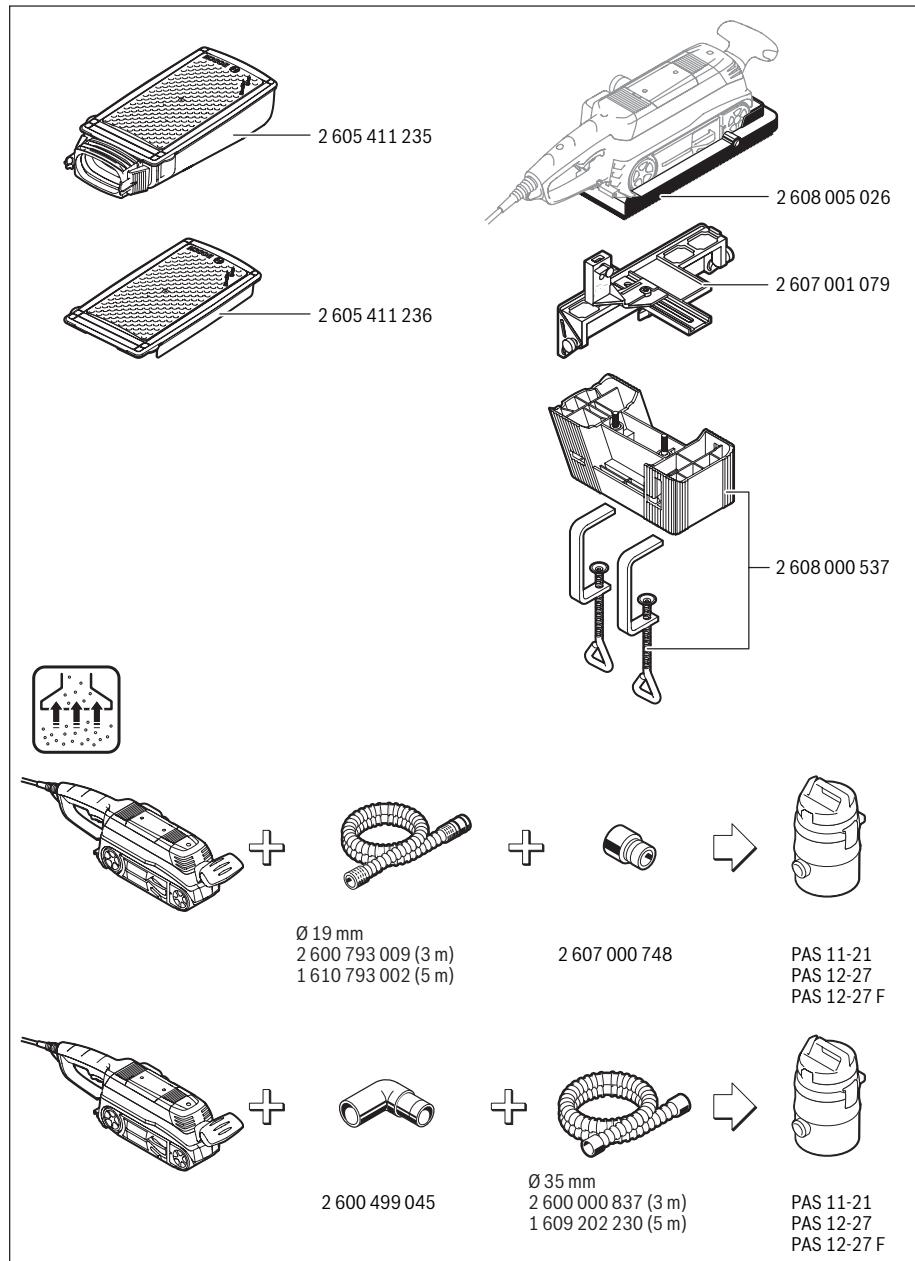

► **Conserver la zone de travail propre et bien éclairée.** Les zones en désordre ou sombres sont propices aux accidents.

► **Ne pas faire fonctionner les outils électriques en atmosphère explosive, par exemple en présence de liquides inflammables, de gaz ou de poussières.** Les outils électriques produisent des étincelles qui peuvent enflammer les poussières ou les fumées.

► **Maintenir les enfants et les personnes présentes à l'écart pendant l'utilisation de l'outil.** Les distractions peuvent vous faire perdre le contrôle de l'outil.

Sécurité électrique

► **Il faut que les fiches de l'outil électrique soient adaptées au socle. Ne jamais modifier la fiche de quelque façon que ce soit. Ne pas utiliser d'adaptateurs avec des outils à branchement de terre.** Des fiches non modifiées et des socles adaptés réduiront le risque de choc électrique.
